

Appln No. N/A
Amdt date June 8, 2006

Amendments to the Specification:

Please amend the specification as follows:

On page 5, please delete the paragraph beginning on line 31 through line 33 and replace it with the following:

[~~A-preferred~~] An exemplary embodiment of the solution according to the invention [~~consists~~] comprises [~~in~~] the adjustable part of the lateral film guide [~~comprising~~] having at least two lateral film guide elements spaced apart from each other.

On page 7, please delete the paragraph beginning on line 8 through line 12 and replace it with the following:

This sensor [~~preferably consists in~~] senses the noise produced during the film transport or the vibrations caused by the film transport being registered and the position and alignment of the film guide [~~being~~] can be changed manually by an operator, for example by actuating the setting screw, in the direction of minimizing the noise and vibration.
